**ASSURANCE STATEMENTS**

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

To Whom It May Concern,

Attached please find the Annual Report for Capital University, Columbus, Ohio.

The only regulated animals housed at this facility are 11 Siberian Hamsters. The hamsters are used in an educational protocol approved by the Capital University IACUC. The light:dark cycle of the animals is changed from 12 hours of light and 12 hours of darkness (12:12) to 8 hours of light and 16 hours of darkness (8:16) over the course of a 14 week semester. This perturbation in circadian timing is no threat to the health or safety of the animals but is a departure from their standard care. The animals suffer no pain and no apparent distress. Light:dark cycles are returned to 12:12 over 4 weeks post semester.

Respectfully,

(b)(6), (b)(7)(c)
